Demography report 2023   22 June 2023

Please select any country or region, then obtain official demographic data, longitudinally if possible. Then conduct demographic analysis and describe its characteristics.

The easiest way to obtain data in R software is to use **wpp2019** package (**wpp2022** will be available soon, but not yet) for the world, **fmsb** package for Japan. Anyway, you have to describe how to obtain the data with its source information.

More than 1 page pdf file should be attached on e-mail to minato-nakazawa@people.kobe-u.ac.jp.

Deadline is 31 July 2023.
