

Demography report 2025

12 June 2025

Please select any country or region, then obtain official demographic data, longitudinally if possible. Then conduct demographic analysis and describe its characteristics.

The easiest way to obtain data in R software is to use **wpp2022** or **wpp2024** package* for the world, **fmsb** package for Japan. Anyway, you have to describe how to obtain the data with its source information.

More than 1 page **pdf** file should be submitted to BEEF+.

Deadline is 6 August 2025.

For wpp, see <https://population.un.org/wpp/>

```
install.packages("wpp2022", dep=TRUE)
or
library(devtools)
options(timeout = 600)
install_github("PPgp/wpp2024")
```
